METALTEK INTERNATIONAL NAMES E.J. KUBICK PRESIDENT OF WISCONSIN CENTRIFUGAL

WAUKESHA, WISCONSIN – MetalTek International, headquartered in Waukesha, Wisconsin USA, has named E.J. Kubick President of the Wisconsin Centrifugal Division, based in Waukesha. Mr. Kubick served as President of Carondelet Foundry Division of MetalTek from June 2003 through June 2006, before becoming Vice President of Operations at Wisconsin Centrifugal. He will become only the 6th President in Wisconsin Centrifugal's 63-year history.

Larry Blanton has been named Senior Vice President, MetalTek Sales and Marketing. He will continue to lead Sales, Marketing, and business development for all of MetalTek, including extending the reach of the newly acquired Meighs Casting Division. As a part of that, Mr. Blanton will emphasize the expansion of MetalTek's International sales representation and generation of new business from targeted international markets.

Robert Smickley remains as CEO of MetalTek International. The above changes allow Mr. Smickley to place increased focus on implementing the company's long term strategic growth plan.

MetalTek International is a leading manufacturer of high alloy components for demanding temperature, wear, and corrosive applications. Products are supplied from five manufacturing plants to customers in over 25 countries worldwide.
