

## ***MetalTek Continues Expansion with New European Sales Team***

MetalTek International one of the world's leading metals experts is pleased to announce the appointment of Peter O'Reilly as European sales director and Angela Taylor as Sales Manager for Meighs Castings Ltd.

Mr. O'Reilly joins MetalTek's Global Sales team with over 25 years experience working within the UK valve manufacturing industry and has developed a thorough understanding of the importance of casting in the manufacturing supply chain. Based at the recently acquired European facility, Meighs Castings in Stoke on Trent, UK, which is now the company's European headquarters, Mr. O'Reilly's key objective is to grow MetalTek's business throughout Europe.

Meighs Castings is famous for aluminium bronze alloy castings for both commercial and naval applications. In recent years it has also become very successful at casting special alloys such as Hastelloy, Duplex, Super Duplex and Monel.

MetalTek facilities include some of the industry's leading centrifugal, investment, sand and continuous casting facilities, from which it can offer customers a single source solution, one that can competitively deliver components that provide superior performance and far greater value for money.

Mr. O'Reilly said: "I was very excited when MetalTek approached me to join their growing global business. Whether it's finished machined bronze bushings, large fabrications for petrochemical or nuclear applications, complex investment castings for defence applications, or a forging conversion that leverages capabilities from multiple facilities, MetalTek has the technical and metallurgical expertise."

Ms. Taylor has considerable experience in the foundry and forging industry having spent many years developing sales for well known names including: Wm Cook Castings Ltd and Firth Rixson Forgings working with customers throughout Europe such as RR Aerospace, Derby, Fisher and Caterpillar in France, Tyco Group in Holland and France, BMW/RR In Germany. Ms Taylor is keen to pursue strategic partnerships for the mutual benefit of both the customer and the foundry.

***About MetalTek***

MetalTek has five international facilities with more than 3000 customers across the globe and pours more than 17,000 metric tons consisting of over 400 ferrous and non ferrous alloys. Concentrating on metal solutions in the heat, wear and corrosion markets, the company also has more than 20 fully qualified and experienced metallurgists.
