METALTEK WISCONSIN CENTRIFUGAL REACHES ONE MILLION HOUR SAFETY MILESTONE.

WAUKESHA, WISCONSIN – MetalTek International, Inc. announced today that its Wisconsin Centrifugal Division has surpassed one million man hours worked without a lost time incident at their operations located in Waukesha, Wisconsin. MetalTek's Waukesha site achieved this record over nearly a year-long period, beginning in June 2008.

This safety milestone is a direct result of each Wisconsin Centrifugal employee's personal dedication to safety awareness and practices. This achievement reflects the solid safety program at Wisconsin Centrifugal supported by a behavior-based safety culture, management commitment to continuous safety training, inspection and monitoring activities, and an enhanced incident review process. Wisconsin Centrifugal President E.J. Kubick noted, "Safety is a fundamental part of what we do. Our culture empowers our people to be responsible for the safety of themselves and the group. We are proud of our record in a hazardous environment, but will not be satisfied until all incidents are avoided."

MetalTek International is a leading manufacturer of high alloy components for demanding temperature, wear, and corrosive applications. Products are supplied from five manufacturing plants to customers in over 25 countries worldwide.
