METALTEK WISCONSIN INVESTCAST REACHES TWO YEAR SAFETY MILESTONE.

WAUKESHA, WISCONSIN – MetalTek International, Inc. announced today that its Wisconsin Investcast Division has gone over two years without a lost time injury at their operations located in Watertown, Wisconsin. MetalTek's Watertown site has not had a lost time injury since February, 2007.

This safety milestone is a direct result of each Wisconsin Investcast employee's personal dedication to safety awareness and practices. During the later half of 2006, Wisconsin Investcast began implementing a "stop for safety" program as a part of the company's efforts to improve the safety culture. This safety program empowers employees, as individuals, to make safe choices in their daily lives at work and at home. Wisconsin Investcast's plant manager Eric Skibo remarked, "The results we have obtained occur because of the commitment each employee has for working in a safe environment. We continually need to be aware of our fellow workers and surroundings and ask the simple question - Is that safe? I applaud the results so far and look forward to this only being the beginning of our quest for safety".

MetalTek International is a leading manufacturer of high alloy components for demanding temperature, wear, and corrosive applications. Products are supplied from five manufacturing plants to customers in over 25 countries worldwide.
